Youssef Hossam Eldin

Software Engineer

Alexandria, Egypt | (+20)1279932792 | youssefhossam2902@gmail.com | GitHub | LinkedIn | Portfolio | Completed Military Service

SUMMARY

Software Engineer (Laravel/WordPress) specializing in building scalable RESTful APIs, database architectures, and real-time web applications using PHP, Laravel, and MySQL. Experienced in integrating external services and payment gateways. Proficient in developing advanced LMS and e-commerce platforms. Gained hands-on experience by contributing to real-world projects, delivering maintainable, high-performance applications with a strong focus on clean code and software quality. Currently seeking opportunities to contribute as a Backend Developer.

Experience

Backend Laravel Developer — **Gen-Tech** — *Fifth Settlement, Egypt* — **06/2025 – Current**

- Architected and enhanced scalable RESTful APIs (documented via Swagger/OpenAPI) to power complex workflows.
- Developed a wallet & financial system to automate commissions, milestone refunds, and user balance calculations (available, held, and total).
- Engineered real-time communication features (chat and notifications) via Laravel Reverb and WebSockets.
- Integrated third-party services, including Paymob payment, MinIO/AWS S3 storage, and Google/Microsoft OAuth.

Wordpress Developer — **Gen-Tech** — *Fifth Settlement, Egypt* — **10/2024 – 06/2025**

- Designed responsive WordPress websites, implementing multilingual architectures and dynamic content (Custom Post Types & Loops).
- Built and integrated custom WordPress plugins to extend functionality for specialized business needs, including LMS and booking systems.

Full Stack Wordpress Developer — **ITI** — *Alexandria, Egypt* — **05/2024 – 08/2024**

- Completed the Intensive Code Camp (ICC), CMS Track.
- Developed full-stack web applications, focusing on both front-end and back-end development using PHP and Wordpress.

EDUCATION

Bachelor of Computer Science (GPA: 3.6/4) — **Alexandria University** — *Alexandria, Egypt* — **10/2018 – 07/2022**

- Department of Computer Science and Statistics.

PROJECTS

Mawrid (Freelance Marketplace Platform)

- **Tech Stack:** PHP, Laravel, MySQL, Reverb, RESTful APIs, Passport, Socialite, MinIO/AWS S3, Swagger/OpenAPI, Spatie Media Library.
- Implemented a dynamic platform commission system, automated milestone refund workflows, and an internal wallet system tracking available, held, and total user balances.
- Expanded the platform's core job management by integrating third-party services, including MinIO (S3-compatible) storage with pre-signed URLs for secure file handling, Paymob payment gateway for corporate wallet top-ups, and Google/Microsoft OAuth for seamless authentication.

Pro SafeSqaud (Fitness & Event Management Platform)

- **Tech Stack:** PHP, Laravel, MySQL, RESTful APIs, Laravel Passport, Spatie Media Library.
- Designed a RESTful API to manage dynamic training sessions, customizable exercise blocks, and user progress tracking.
- Engineered robust session assignment systems with dynamic scheduling and automated email notifications for users.

Rbtly (Link Management & Page Builder)

- **Tech Stack:** PHP (Custom MVC Architecture), MySQL, GrapesJS (Drag-and-Drop Builder Integration), JavaScript, HTML/CSS.
- Integrated an advanced drag-and-drop page builder (GrapesJS) seamlessly into a legacy PHP system for creating dynamic Bio Pages.

Advanced WordPress Solutions (Gen-Tech, Aqlam-lms, O2H-Marketing, Hawaaeg, Sibgha, Genius-Education, Misk)

- **Tech Stack:** Wordpress.
- Developed advanced e-commerce, LMS, and corporate platforms integrating complex solutions.

SKILLS

- **Backend**: PHP, Laravel, RESTful APIs, WebSockets, MySQL, RBAC, MinIO/AWS S3, OAuth, Payment Gateways, C++, Java, Python.
- **Frontend**: HTML, CSS, JavaScript, Bootstrap.
- **WordPress**: Elementor, Custom plugin development, WooCommerce, Polylang, JetEngine, Amelia LMS, Tutor LMS.
- **Version Control & Tools**: Git, GitHub, GitLab, Postman.

LANGUAGES

- Arabic (Native), English (Intermediate).
